

Diabolo

(caractéristiques techniques)

J3835

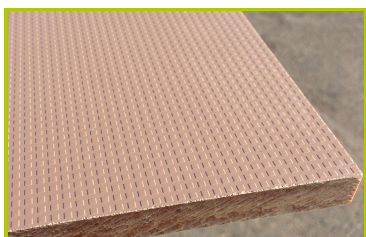

1- **The 125mm diameter posts** are made of painted galvanised steel, ensuring robustness and durability. The caps are made of injection moulded polyamide.

2- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

3- **The roof** is made of 10mm thick polyethylene plates.

4- **The platform and the climbing wall** are made from a 12.5mm thick textured and non-slip compact material (HPL).

5- **The anti-slip steps** are made of corrugated aluminium sheets ensuring durability and lasting good looks.

6- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

7- Injection moulded polyamide fixings connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

8- The sliding surface is made of 2mm thick stainless steel, which is shaped, bent and rolled from one piece.

9- The climbing holds are made of polypropylene. They are non-toxic, inflammable and shock and UV resistant.

10-The abacus spheres are made of polycarbonate sheets.

11-The handles are made of very strong polyamide plastic.

12-The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
