

## Parcours d'équilibre et d'escalade

J4945

(caractéristiques techniques)

1- The different posts (average diameter: 60 to 80mm / 100 to 120mm / 120 to 140mm) are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- The stair treads (with average diameter 25 to 30cm) are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

**3- The 16mm diameter ropes** are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

**4-** The fixings for the nets and chains are made from aluminium.

5- The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
